**Subject:** Allen's Family Foods, Allen Harim, Pinnacle

Good morning, troops! Due to some FOIA interest, I am in the middle of organizing/scanning the Allen NPDES Permit No. DE 0000299 and Pinnacle NPDES Permit No. DE 0000736 files in the hallway, so I'm trying to gather up any and all info we may have.

I would like to request that any emails be placed directly into F:\SURFACE WATER\NPDES Files\Facility Name\Correspondence\Email and that anything else be given to me (rather than put into the file at this point because I already starting scanning a bunch) so I can scan it and either return it or put it in the files.

Glenn, that folder you gave me was already scanned, so I don't need that back, but I didn't know if you have anything else? I know most of you won't have anything (Jena, Beau, etc.), so please just let me know that. THANK YOU!! Molly

**Subject:** PRESS RELEASE: Community Involvement Advisory Council sets public workshop on development of Vlasic Pickle/Pinnacle site for Thursday, Nov. 21

**NEWS FROM THE DELAWARE DEPARTMENT OF NATURAL RESOURCES AND ENVIRONMENTAL CONTROL**

**REISSUING to clarify that the Community Involvement Advisory Council (CIAC) public workshop will be held at the Millsboro Town Hall, 322 Wilson Highway, Millsboro, DE 19966.**

**Contact:** Michael Globetti, DNREC Public Affairs, 302-739-9902

**Community Involvement Advisory Council sets public  
workshop  
Thursday, Nov. 21 in Millsboro on development of Vlasic  
Pickle/Pinnacle site**

DOVER (Nov. 12, 2013) – The Community Involvement Advisory Council (CIAC) will hold a public workshop Thursday, Nov. 21, on the potential redevelopment of the former Vlasic Pickle site at 29984 Pinnacle Way in Dagsboro. The workshop is scheduled for 3-5 p.m. at the Millsboro Town Hall, 322 Wilson Highway, Millsboro, DE 19966.

Allen M. Harim Foods has entered into a brownfields development agreement (BDA) with DNREC, with the intent of purchasing the site and converting the facility to a poultry processing plant. A BDA is an agreement between DNREC and a brownfields developer with respect to a Certified Brownfields Site that sets forth a scope of work and remedial activities during development of the site. A public hearing on the brownfields development agreement and a proposed plan of remediation by DNREC's Site Investigation and Restoration Section is scheduled for Wednesday, Dec. 4, at the Millsboro Fire Hall, 109 E. State Street, Millsboro, DE 19966, starting at 6 p.m.

The public workshop will afford concerned residents an opportunity to understand environmental issues being addressed by DNREC in the event that the former Vlasic Pickle site is acquired by Allen M. Harim Foods and converted to a poultry processing plant.

The workshop is the Community Involvement Advisory Council's response to public comments on the brownfields development agreement. DNREC subject matter experts will be present at the workshop to address specific questions about the site. The Department of Health and Social Services' Office of Drinking Water (ODW) will also be present to discuss surrounding community drinking water systems to the Vlasic/Pinnacle site.

A panel of subject matter experts will provide an overview of the permitting processes, and also will explain the public health and environmental protection provided by DNREC's permitting programs. DNREC and ODW staff will be available for questions at poster stations located throughout the hall. Subject matter experts will reconvene for a question-and-answer session at the close of the workshop.

The CIAC was established in 2001, under Senate Bill 33 to enable DNREC to interact with communities in the best possible manner. The 11 member body is appointed by the Governor to advise the DNREC Secretary on matters such as the relationships and interactions between the Department and communities throughout the state. In addition to its primary charge of assuring that no community is disparately affected by environmental impacts, the CIAC is also responsible for increasing community participation and the flow of information between communities and the Department.

For more information, please contact James Brunswick, DNREC community ombudsman, or Robert Newsome, Site Investigation and Restoration Section public information officer, at 302-739-9000.

**Subject:** FW: Pinnacle permit

As per your request here are points for Harim meeting also attached is the spray permit:

Spray Permit: Current Pinnacle permit expires 2016

- \* Transfer of ownership is a minor amendment
- \* Current permit to discharge processing water from plant pasteurizers
- \* If discharge changes to treated wastewater permit needs to be amended
  - \*\*This would be major amendment to permit
  - \*\*Requires a new Design Development Report
  - \*\* GWDS reviews and advertise for change
  - \*\* Most likely Public Hearing

Ribs Permit: GWDS has letter of intent

- Site Investigation Report required (not submitted at this time)
- Groundwater Impact Assessment (not Submitted at this time)
  - GWDS reviews SIR
  - Water Protection Branch reviews GIA (60 days)
  - Once both are approved applicant moves to design and submits application
- Once application received
  - Advertise 15 days
  - Most likely Public Hearing

- After construction an Operation Permit would be advertised and possible public hearing

Here are our bullets for the process. The DDR, SIR and GIA may be submitted at the same time. I would suggest that we would advertise both permits at the same time for construction so we would have one Public Hearing

**Sent:** Wednesday, November 13, 2013 9:12 AM  
**To:** Schepens, Dave J. (DNREC)  
**Cc:** Baust, Marlene M. (DNREC); Caruthers, Derrick P. (DNREC)  
**Subject:** FW: Pinnacle permit

Dave,  
The Pinnacle spray irrigation operation permit is attached. The permit expires in 2016. Transfer of ownership is considered a minor amendment, and does not require public notification. However, the existing permit limits the discharge to processing water from the plant pasteurizers. If Allen's wants to discharge treated wastewater, the permit would need to be amended to incorporate the new treatment plant and wastewater stream, and a new Design Development Report would need to be submitted. This would be considered a major amendment, requiring public notice.

We have not yet received a Letter of Intent to initiate a RIB study. Before we would approve a site for RIB construction the applicant would need to submit a Soil Investigation Report, then a Groundwater Impact Assessment to demonstrate the site is suitable for RIBs. None of these reports have been submitted for our r

**From:** Hummel, Anthony E. (DNREC)  
**Sent:** Thursday, November 14, 2013 1:37 PM  
**To:** Ashby, Bryan A. (DNREC)  
**Subject:** RE: Pinnacle permit

Bryan:

As I had said in our meeting with the Secretary/Deputy Secretary when this first came to light, my understanding at the time of the negotiation of the Vlastic/Pinnacle permit offsets was that it was a "one-off" thing. That is, we negotiated the offsets to keep the Vlastic Plant viable and the jobs that came with it in the State of Delaware, and if the plant went away so did the offsets. At the time, it was at least partially a political decision made at the Director level (or above) to make it happen. With that being said, it is or will be also a decision for the Director/Secretary to extend the offsets to Allen-Harim if possible.

The offsets in the current Pinnacle Permit include the following:

1. Elimination of Corn Production on an adjacent 35 acre parcel of land;
2. Planting and harvesting Reed Canary Grass on the 35 acre parcel; and
3. Pumping and Treating of groundwater used for production.

Whether or not we can extend all of these offsets to Allen-Harim depends on whether or not they plan to maintain them.

#1 could be extended as long as the corn production does not resume.

#2 could be extended if they want to continue planting, harvesting, and removing the reed canary grass from the watershed. If they plan to use the 35 acre parcel for RIBS or anything other than the current use, then this offset should not be continued.

#3 could be easily extended if they continue to pump and treat groundwater for process water use. I assume that they will be using a bunch of groundwater for processing.

As for the bullet points you asked for in the first place, the path forward is as follows:

- Request for permit transfer/change of ownership would be a minor modification
- Request for change in treatment process and associated modifications would require a construction permit from Molly
- Construction Permit requires Public Notice (30 days?)
- Request for modification of the permit to discharge wastewater would require a new/amended application with data on the anticipated quantity and quality of the proposed discharge
- Major modification/Amendment of the current permit based on the new Application would require Public Notice (30 days)
- We can expect significant scrutiny/concern from EPA
- Public hearing is a possibility if someone requests one. This would obviously prolong the process.

Let me know if you need anything further.

Thanks, Tony

**Subject:** RE: Harim

Good Morning . . . I am waiting for Henry to call me back about a day to meet this week and discuss current thoughts on a "Leaching Pond". He should be getting back with me later this morning. I did speak with Ron Graeber about the "Leaching Pond" and we both agreed that it is similar to a RIB, and ground water would need to investigate this possibility and the design of said pond. Do you have any time this week to meet with the folks from Allen's Harim?

**Subject:** Meeting w/ Allen's Harim Tomorrow

Dave Schepens/Ron Graeber suggested that maybe we take our hydrologist and someone from water supply to the meeting tomorrow to further understand what Harim is proposing. Is it OK to take these extra folks with me or do we want to continue to keep the number of people involved to a bare minimum? It would be me, Brian Ashby(possibly), Ron Graeber, Blair Venables, and Jack Hayes.

Glenn, I have a few questions for you; so many things are up in the air here but I'm trying to stay out front of potential issues.

- I will be out of stored food in a couple of weeks; our thought is to use Dogfish. Do you need anything from us in that regard?
- DMR QA samples; I have not ordered yet, should I, my schedule as of now is to be here through 5/31.
- Where do I get the permit renewal application?
- Are any of the Rural Water classes at the fair "direct" hours?

Thanks,

Bob Lynch

**Sent:** Tuesday, February 05, 2013 9:43 AM  
**To:** Ashby, Bryan A. (DNREC); Davis, Glenn F. (DNREC)  
**Subject:** FOIA Request

Per the attached FOIA request, below is my DRAFT response. Please let me know if this is ok and/or let me know how to make it better! Thank you!

Mr. Lasako,

In response to your February 5, 2013, request for information pertaining to the Vlastic Pickle Plant (Pinnacle Foods), 29984 Pinnacle Way, Millsboro, DE 19939, tax parcel nos. 233-5.00-14.00, 233-5.00-15.00, 233-5.00-16.00, the Surface Water Discharges Section (SWDS) of the Division of Water, Department of Natural Resources and Environmental Control, responds:

Please see the attached NPDES Permit No. DE 0000736, a Minor Modification to the NPDES Permit and the associated Fact Sheet.

We have additional information including their application, legal notices, correspondence, Discharge Monitoring Reports (DMR's), public hearing information, QA/QC Reports, Bioassay data, laboratory information and compliance/noncompliance inspections, reports and letters. There are a couple of options here:

1. You can make an appointment with Marla Chase ([marla.chase@state.de.us](mailto:marla.chase@state.de.us) or 302-739-9946) to review these files, mark the files or documents that you would like copies of, we would prepare an invoice in accordance with the attached policy, you would accept and pay the invoice if you want, we would make the copies and transmit to you, either that day or later as our schedules allow.
2. Or, you can make an appointment as above, bring your own copier/paper to make copies you would like and bring a check for administrative time at \$20 per hour, payable that day. Please contact me with any questions.

Please note, additional information may have already been provided or may be forthcoming from other State agencies.

Just as an fyi, the SWDS administers seven (7) programs, including Concentrated Animal Feed Operations (CAFO), Biosolids, Municipal Separated Storm Sewer Systems (MS4), Industrial Storm Water, National Pollutant Discharge Elimination System (NPDES), Pesticides, and Wastewater Construction permits.

**Flag Status:** Flagged

Dave,

The following are the permits we currently have for the Pinnacle facility and the ones that would be required for the proposed use.

GWDS: Spray Irrigation permit

SWDS: NPDES Permit (which can be transfered from Pinnacle but will require numerous modifications and public notice)

Construction Of Wastewater Collection and Conveyance Systems for the construction of the new WWTP at the facility

Approved Storm Water Pollution Protection Plan (no permit or fee on this)

An SPCC Plan (don't believe there is a permit or fee required on this)

WSS: 74 well permits

In addition, in the information you provided to Glenn and I he thinks they also mentioned something about putting in "leaching lagoons" ?? (if they are looking to put in some type of RIB system, they will need permits for that as well (Groundwater Section). He will be calling the folks at Allen Harim to get some additional info on what they mean by leaching lagoons.

Please let us know if you need any additional information.

To: Mackil, Molly J. (DNREC)  
Subject: FW: FOIA Request DW 2013-06-19-01  
Importance: High

I am not personally responding to this request. I had forwarded the initial FOIA request to Jenny Bothell as this could potentially involve action from other divisions/OTS. As for DW, each section is evaluating what information they have and will contact the requestor directly with a cc to me.

**Subject:** RE: Outfall Locations  
**Attachments:** StateNPDES\_Including\_Inactives.7z

I found a NPDES Points layer at J:\npdes\npdes. It has 177 points (red dots below); includes some stormwater (SW) outfalls. Good bet there are more places in the GIS system with NPDES layers.

I have worked with Chris Cleaver over the years to add SW outfalls for individual permittees. A lot are in there, but I doubt all. I update a local file (now 251 points, yellow circles below), and send them every few years to Deb Sullivan to update their GIS system. I attached everything I update locally, in case anybody is interested. Those points. prob. include a lot of internal outfalls for DCR and NRG Indian River Power Plant, as well as some inactives.

The request is prob. better off with the J:\npdes\npdes stuff.

Most De. NPDES facility discharges eventually end up in the De. River, De. Bay and Atlantic Ocean:

**Subject:** FW: Outfall Locations

Hi guys,

I was forwarded the below request by Kate Flemming who is working on and Ocean and Bay Planning Project for the Mid-Atlantic Regional Council on the Ocean. Does anyone have knowledge of any mapping layers or information concerning outfall locations and/or outfall flow information for the DE Bay? Or do you know of a resource Kate should pursue outside of DNREC that may have that information?

Thanks in advance!

Jenn

**To:** Roushey, Jennifer S. (DNREC)  
**Subject:** Outfall Locations

Hi Jen,

Thanks for speaking with me this morning. As I mentioned on the phone, I'm interested in identifying the locations of the outfalls that exist along Delaware's coast – particularly along DE Bay, as I believe we already have the location of the one I know to exist on the Atlantic Coast. We'd like to incorporate these outfall locations into an Ocean and Bay Planning project that we are initiating at DCP. Also, as a second step, we may be interested in mapping the flow of effluent discharged through the outfalls, so that information would be helpful too.

If the locations aren't readily available I'd be interested in some tips on where to go next to track them down. Thanks for your help!

**To:** Hummel, Anthony E. (DNREC); Davis, Glenn F. (DNREC)  
**Subject:** Permit Extension - Pinnacle

Here is a copy of the PDF of the letter requesting an extension to the permit application for Pinnacle. I've also filed it in: F//Surface Water/NPDES Files/Pinnacle/Permit Applications.
